CLCS76eN-BAS STEAM

High Temperature Corner Scrapper Rack Conveyor Dishwashing Machine

SPECIFIER STATEMENT

Specified dishwasher will be Hobart CLCS76eN Base steam tank heat model with corner scrapper and Opti-Rinse™. Includes 245 racks per hour capacity, 22" power scrapper, dirty water indicator, configurable "intelligent" de-lime notification, insulated ergonomic cabinet style doors, top mounted computer controls, and NSF approved pot and pan cycle mode. The wash tank utilizes durable precision pressure sensor monitors in lieu of conventional mechanical floats.

STANDARD FEATURES

- 245 racks per hour
- 22" power scrapper
- Opti-Rinse[™] system
- Rapid return conveyor drive mechanism
- Large double door opening for ease of cleaning
- Doors are insulated & hinged with door interlock switches
- + 19.5" chamber height opening
- Top mounted micro-processor control module
- Energy saver mode (programmable auto-shut down) +
- Dirty water indicator +
- Manager activated low temperature alert +
- + NSF rated configurable pot and pan dwell mode
- Configurable "intelligent" delime notification
- Service diagnostics +
- Self-aligning wash manifolds +
- + Stainless steel anti-clogging wash arms
- Stainless steel self-draining pump and impeller
- Single, sloping scrap screen and deep scrap basket +
- Stainless panels enclose perimeter and bottom +
- Door actuated drain closure
- Convertible hot water or low temp final rinse
- Vent fan control
- Booster heater control

OPTIONS & ACCESSORIES (Available at extra cost)

- □ Standard, short, and extended stainless steel vent hoods
- □ Internal stainless steel pressure-less 30 kW booster heater field convertible to 15 kW (booster includes PRV)
 - Dual point electrical connection standard on 208/60/3 and 240/60/3 voltage machines, when equipped with internal electric booster; single point kits available (see page 3)
 - Single point connection standard on 480/60/3 voltage machines, when equipped with internal electric booster
- External #150 steam booster heater
- Direct drive unloader adds 38" length; reference spec F39520 for more details
- Blower-dryer adds 33¹/₄" to length; reference spec F40252 for more details (ships separate from di shmachine, contact Hobart Service for installation)
- □ Drain water tempering kit (field installed)
- □ Flanged feet kit (requires two kits)
- □ Higher than standard chamber (24" opening)
- □ Table limit switch with 10' wire
- □ Correctional package (contact Hobart for details)
- □ Pressure regulator valve (PRV), for use with external booster
- Water shock absorber kit

Approved by

- □ Factory-mounted circuit breakers (contact Hobart for details)
- □ Field installed single point kits available for 208/60/3 and 240/60/3 machines when equipped with internal booster

CLCS76eN-BAS STEAM **High Temperature Corner Scrapper**

Rack Conveyor Dishwashing Machine

CLCS76eN-BAS STEAM

High Temperature Corner Scrapper Rack Conveyor Dishwashing Machine

LEGEND

Electrical Connections						
Required when machine equipped with SINGLE POINT ELECTRICAL CONNECTION						
E1	Motors, controls AND 30kW booster heater – multiple knockouts provided, 63-3/4" AFF.					
Required when machine equipped with DUAL POINT ELECTRICAL CONNECTION						
E2	Motors and controls – multiple knockouts provided, 63-3/4" AFF.					
E3	E3 Internal 30kW booster heater – multiple knockouts provided, 63-3/4" AFF.					
	Multiple knockouts provided for 2", 1" and 1/2" trade size conduits.					
	Plumbing Connections					
P1	Drain. May be drained to either side of valve, plug opposite side 2" FPT. Recommend a floor drain minimum of 12" from machine for access and maintenance. 7-3/8" AFF.					
P2	Hot water. 1/2" FPT connection. 1/2", 11-3/16" AFF. See plumbing notes for required temperatures.					
Р3	Optional cold water connection for drain water tempering 1/2" FPT, cold water temperature 80°F, maximum 7-3/8" AFF.					
	Steam Connections					
P4	Steam coils: 10 to 50 PSI flowing, 3/4" FPT, 11-18" AFF.					
Р5	Condensate return: A 10 PSI minimum differential pressure across the steam trap must be maintained. 3/4" FPT, 11-1/8" AFF one connection. (One bucket type trap furnished).					
	Vent Connections					
V1	Optional vent hoods, 4" x 16" vent stack with damper.

CLCS76eN-BAS STEAM

High Temperature Corner Scrapper Rack Conveyor Dishwashing Machine

WARNING: Plumbing and electrical connections should be made by qualified personnel who will observe all the applicable plumbing, sanitary, safety codes and National Electrical Code.

Plumbing Notes: Minimum incoming water temperatures: 110° F for 30kW internal booster, 140° F for 15kW field converted internal booster, 180° F without internal booster. Building flowing water pressure to dish machine is 20 PSI, (+/- 5 PSI). For non-booster machines, a PRV with internal expansion bypass is required. When ordered as an accessory, ½" brass regulator must be installed before the booster. Water temperature to the regulator must not exceed 140° F.

Recommended water hardness to be 3 grains or less for best results.

Steam Heat Only: Flowing steam pressures above 50 PSI must have a pressure regulator (by others) installed in the steam line.

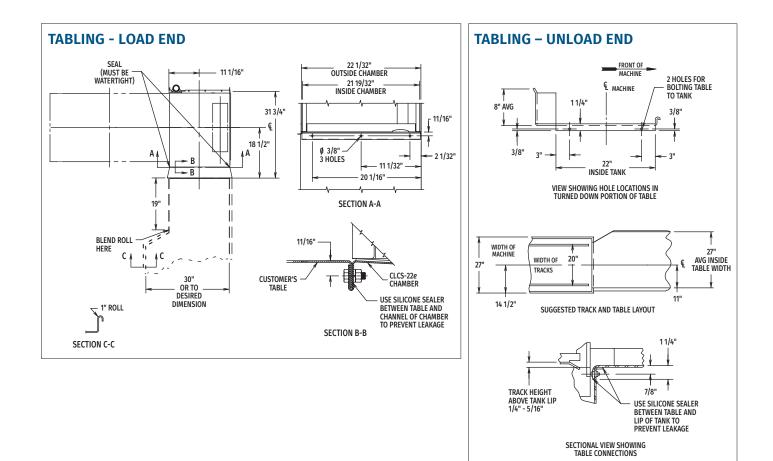

Shut off valve must be supplied (by others) in the steam line to the dish machine.

Electrical Note: Dishmachine not provided with internal GFCI protection.

NOTE: 30kW Booster Heater field convertible to 15kW when 140°F incoming water provided. (Conversion instructions located in machine control box. Contact factory for 15kW booster amperage ratings.)

NOTE: Additional CLeN Voltages and Amperages are available, see document F40972.

As continued product improvement is a policy of Hobart, specifications are subject to change without notice.
