SMART DELIME™

with Auto Delime, Auto Dispensing & Booster Assurance

Auto Delime combines water hardness & cycle counts to let operators know when it's the right time to delime.

Auto Dispensing & Booster Assurance automatically dose delimer into the machine & booster.

Automatic Deliming runs in the background allowing staff work to work on other tasks.

Simplify Deliming to Reduce Labor Time & Cost & Increase Safety

Auto Delime combines water hardness & cycle counts to let operators know when it's the right time to delime, saving time and chemicals while maintaining peak machine performance.

Auto Dispensing automatically doses delimer into the machine, preventing excessive dosing while reducing the handling of chemicals, making it safer for operators.

Booster Assurance injects delimer directly into the booster, preserving machine life and helping to prevent premature booster failure.

EXPERIENCE REAL LABOR SAVINGS & INCREASED SAFETY FOR YOUR OPERATION*

**SAVE UP TO
30 MINUTES
EACH TIME
YOU DELIME**

**50%+
REDUCTION
IN DELIME CYCLES**

**UP TO
\$250
ANNUAL COST
SAVINGS**
